SUMMARY

Enthusiastic Python Full Stack Developer with strong knowledge of Python, HTML, CSS, JavaScript, and basic frameworks like Django/Flask. Skilled in building responsive web applications, working with databases, and understanding backend logic. Eager to learn new technologies and contribute to real-world projects.

PROJECTS

Women's cell activities

Developed a centralized system to store and manage data related to women's cell activities including event tracking, grievance handling, and counseling records. The system enables secure access, role-based permissions, report generation, and efficient documentation of awareness programs and support services, promoting better transparency and organization. Skills used - HTML,CSS,PHP,SQL
